#### VINEYARD MANAGEMENT

Double guyot pruning.

Two disbuddings and three canopy liftings.

Light cluster grooming to disentangle the bunches and improve aeration of the fruiting zone.

Work on the soil under the rows to promote rooting and soil breathing.

Lower hedge trimming to limit leaf area and therefore reduce water loss through transpiration.

Reduced mowing of the inter-row cover to limit grass regrowth and competition, while preserving greater soil freshness.

Hand harvesting with careful grape sorting.
